Asynchronous Video Interviews (AVIs) allow candidates to record responses to predefined questions using digital devices, offering flexibility and enabling remote assessments. Evaluating personality traits and cognitive ability through AVIs provides organizations with valuable insights into candidates' profiles and helps predict future job performance. We are hosting the ACM MM 2026 AVIs challenge to promote advancements in personality traits and cognitive ability assessment at ACM MM 2026. This event brings together researchers from psychology, artificial intelligence and affective computing to explore new multimedia AI models aligning with real-life AVI practices for job-related assessment.

We introduce a novel dataset of mock AVIs (3864 videos from 644 subjects) conducted in a simulated job application procedure. Interview questions were designed by psychologists to reflect real-world selection contexts and activate personality traits based on Trait Activation Theory. Annotations for personality traits and job competencies were provided by trained evaluators and professional recruiters, ensuring methodological and ecological validity.

Use is permitted of the databases and annotations above in source and binary form, provided that the following conditions are met:

- The database is provided under the terms of this license strictly for academic, non-commercial, not-for-profit purposes.

- **Redistribution, republishing, or dissemination in any form, source or binary, is not permitted without prior written approval by the licensors.** Linking to the webpage of the database, https://avichallenge.github.io/ is permitted.

- The names of the licensors may not be used to endorse or promote products derived from this software without specific prior written permission.

- The licensors reserve the right to modify the data/license at any point. Modification of the database by licensees are not permitted.

- In no case should the still frames or video be used in any way that could cause the original subject embarrassment or mental anguish.

- The authors of the dataset make no representations or warranties regarding the dataset, including but not limited to warranties of non-infringement or fitness for a particular purpose.

- You accept full responsibility for your use of the dataset and shall defend and indemnify the Authors of AVI2026, against any and all claims arising from your use of the dataset, including but not limited to your use of any copies of copyrighted images that you may create from the dataset.

The database is provided by the authors "as is" and any express or implied warranties, including, but not limited to, the implied warranties of merchantability and fitness. For a particular purpose are disclaimed. In no event shall the copyright holder or contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement of substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of this database, even if advised of the possibility of such damage. The provider of the database makes no representations and extends no warranties of any kind, either expressed or implied. There are no express or implied warranties that the use of the material will not infringe any patent, copyright, trademark, or other proprietary rights.

This form should be signed by a researcher with a permanent position from the institution (e.g., professor, associated/assistant professor) instead of master/PhD students. Students can be listed as participants.

Position _____ Name _____

Institution _____

Signature _____ Date _____

Participant 1 _____ Participant 2 _____

Participant 3 _____ Participant 4 _____

Participant 5 _____ Participant 6 _____

Participant 7 _____ Participant 8 _____
